WHO USES MAMMOTH MEAL?

Mammoth MEAL was designed with a broad range of users in mind. Whether you're a strength athlete or a busy professional looking for healthy alternatives, our delicious superfood shake is the right choice for you!

WEIGHT MANAGEMENT

If you're looking to lose weight, MEAL can make an excellent companion to your weight-loss plan. Most weight-loss programs require a strict adherence to, and knowledge of specific caloric intake amounts. Our "E-Z Dose" system makes it simple to keep track of specific macronutrients and calories. In addition, MEAL uses a low-glycemic carbohydrate blend and high-quality fat sources, which have the ability to curb your appetite and keep your blood sugar levels stable throughout the day. All of these features make MEAL an ideal part of most weight-loss programs.

STACK AND BURN WITH MAMMOTH

WHEN TO USE HOW MUCH TO USE

Dosing will vary from person to person. Factors such as age, weight, height and activity level all need to be considered, but because Mammoth MEAL is essentially a superfood, it is safe to use in most scenarios. The following doses are only recommendations. ***

When to use #1: Mammoth MEAL is an excellent first meal of the day. The quick convenience of MEAL will ensure you never miss breakfast again!

How much to use #1: Adults 2-4 scoops, Teens 2-3 scoops.

When to use #2: Mammoth MEAL has the ideal protein, carb and fat ratio for your post-workout shake. Consume immediately after your workout to help repair muscle tissue and retain lean muscle mass.

How much to use #2: Adults 2-4 scoops, Teens 2-3 scoops.

When to use #3: Mammoth MEAL can be used in between meals throughout the day to ensure you do not miss out on consistent fuel needed to recover and grow new muscle tissue. No time to eat every 3 hours? No problem! Mammoth MEAL is a quick and convenient way to get the protein, carbs and fats you need.

How much to use #3: Adults 3-4 scoops, Teens 2-3 scoops (add one scoop if you are completely replacing a main meal).

When to use #4: Mammoth MEAL is ideal for athletes young and old, who need the proper fuel in between and after sporting events. Perform at your best each and every day with Mammoth MEAL.

How much to use #4: Adults 3-4 scoops, Teens 2-3 scoops.

CONVENIENCE WITH NO SHORTCUTS AND PERFECT SUPPORT FOR TODAY'S BUSY LIFESTYLES.

BUILT TO A STANDARD, NOT A PRICE

When we sat down to design Mammoth MEAL, we didn't follow what our competitors were doing. We weren't trying to be like everyone else. We made a decision early on to make the best meal replacement in the industry. With over two years of research and revision, we are confident you will enjoy this quality-infused, delicious-tasting nutrition shake.

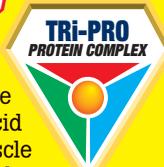

MACRONUTRIENT BLEND

CALORIE BREAKDOWN

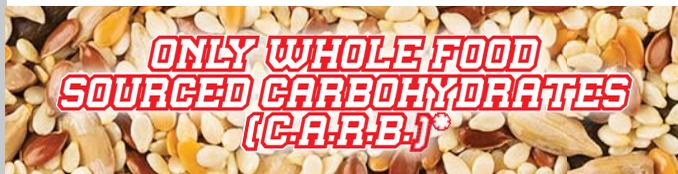

40% : 40% : 20% MACRO SPLIT
PROTEIN CARB FAT

The 40/40/20 approach to macronutrients was first established by Arnold Schwarzenegger as the ultimate blueprint diet plan for physique and performance success. It is viewed as a perfect baseline macronutrient ratio to build a foundation for your daily nutritional intake.

TRI-PRO, THE ULTIMATE SUSTAINED-RELEASE PROTEIN BLEND

Mammoth MEAL contains a unique blend of three proteins named "Tri-Pro" which is formulated to optimize both immediate and sustained amino acid release for optimal recovery of lean muscle tissue. The first two proteins in Mammoth MEAL include Whey Protein Concentrate and Micellar Casein, which are both sustained release proteins. Milk Protein Isolate is the third protein used in the Tri-Pro blend and it provides a source of quickly absorbed protein. This precise blend can kickstart the recovery process while still providing a release of amino acids hours after consumption to help you achieve your health and fitness goals.

ONLY WHOLE FOOD SOURCED CARBOHYDRATES (C.A.R.B.)*

The Mammoth MEAL C.A.R.B* complex is a premium, whole food and organic-based carbohydrate blend designed to maximize sustained energy levels with the perfect blend of low-glycemic carbohydrates. You won't find cheap, sugar spiking carb sources such as dextrose in this formulation. Refer to the "What is in Mammoth MEAL" ingredient list section on this brochure for more details.

*C.A.R.B. = Carbohydrate Assimilation Regeneration Blend

HEALTHY FATS ESSENTIAL NUTRIENTS AND SUPPORTING INGREDIENTS

MEAL provides healthy fats from a vast array of whole food sources as well as technologically advanced sources such as MCTs**. These fats provide amazing cardiovascular health benefits and sustained energy levels throughout the day. Refer to the "What is in Mammoth MEAL" ingredient list section on this brochure for more details.

**MCT = Medium Chain Triglycerides

AVAILABLE IN 3 DELICIOUS FLAVOURS

With over two years of meticulous development, one of our core focuses with MEAL was to fit perfect nutrition in a formula that tastes amazing! Great taste is the reward that patience and time gave us, and as a result, Mammoth MEAL represents a rare blend of excellence in nutrition with world-class flavour profiles.

VANILLA ICE CREAM CHOCOLATE FUDGE BROWNIE STRAWBERRY SHORTCAKE

WHAT IS E-Z DOSE ?

POWDER TO WATER RATIO				MACRONUTRIENT BREAKDOWN			SERVINGS PER CONTAINER
# of SCOOPS	WATER (fl. oz.)		TOTAL CALORIES	PROTEIN (g)	CARBS (g)	FAT (g)	
1 x	+ 4 fl. oz.		= 100	10 g	10 g	2.25 g	80
2 x	+ 8 fl. oz.		= 200	20 g	20 g	4.5 g	40
3 x	+ 12 fl. oz.		= 300	30 g	30 g	6.75 g	27
4 x	+ 16 fl. oz.		= 400	40 g	40 g	9 g	20

We created the "E-Z Dose" system with the aim of making Mammoth MEAL super easy to use. To achieve this goal, we designed each scoop in Mammoth MEAL to contain exactly 100 calories (10 g protein, 10 g carbs and 2.25 g fat). Some people need more calories than others. Some people need to track their caloric intake. However you want to use Mammoth MEAL, we have you covered. Please review the chart above, which outlines Mammoth MEAL serving sizes, macronutrient information, mix ratios and calories.

WHAT THEY ARE SAYING...

As a professional athlete, I am always on the go. Between meetings, games and practices, I rarely have time to eat. That's why I rely on Mammoth MEAL replacement to give me full meals throughout the day. Packed with high-quality proteins, it curbs my appetite and has a rapid absorption rate so I can get all of my nutrients as fast as possible, so I can focus on being a pro."
