MAMMOTH BCAA PERFORMANCE, REPAIR, RECOVERY

WE ARE RESETTING THE STANDARD OF INTRA-WORKOUT RECOVERY

8.2g ^{2:1:1 BCAA} + 1g + 1g = 10.2g

BCAA'S (Leucine, Isoleucine, Valine)
Muscles breakdown BCAAs while training and Mammoth BCAA provides you with an extremely high dose of this to offset this breakdown. High dosed BCAA's have been shown to accelerate recovery, spare any muscle loss, and help ensure no delayed onset muscular soreness.

Glutamine:
This amino acid is essential for recovery and the successful transport of other amino acids, electrolytes, and nutrients across the intestinal barrier. When hydration is a premium during training glutamine helps ensure nutrients carried in water get absorbed properly.

Taurine:
This osmolyte has been proven to assist in endurance performance by maintaining proper water balance and neurotransmission in working muscles. It has also been shown to assist electrolytes in and out of the muscle while training as well and is an essential component to the Mammoth BCAA formula.

A WHOPPING 10.2 g of Amino Acids per serving and the largest 2:1:1 BCAA serving available ANYWHERE!

Medicinal Ingredients / Ingrédients médicinaux:
Serving size 1 scoop (13 g) / Par portion individuelle (1 mesure / 13 g).
Servings per container: 40 / Portions par contenant: 40

Amount per Serving / Quantité par portion	
L-Leucine / L-leucine	4100 mg
L-Isoleucine / L-isoleucine	2050 mg
L-Valine / L-valine	2050 mg
L-Glutamine / L-glutamine	1000 mg
Taurine / Taurine	1000 mg
Coconut Water / Eau de noix de coco	100 mg
Potassium / Potassium	50 mg
Sodium (from 100 mg Pink Himalayan Sea Salt) / Sodium (de 100 mg de sel de mer rose de l'Himalaya)	45 mg
Calcium / Calcium (Calcium citrate / Citrate de calcium)	30 mg
Magnesium / Magnésium (Magnesium Citrate / Citrate de magnésium)	20 mg
BioPerine® black pepper extract / Poivre noir, extrait BioPerine®	5 mg

40 SERVINGS **x6 FLAVOURS** **0g SUGAR** **0g CARBS**

- 100mg Coconut Water Extract:** There is no better complete and natural electrolyte source than coconut water extract. We included it because it's excellent for quick re-hydration and healthy maintenance of body fluid and electrolyte balance.
- 100mg Pink Himalayan Sea Salt:** When you sweat one of the major electrolytes lost is sodium. This critical electrolyte found in its natural form is an essential component of Mammoth BCAA formula to provide you with the form of high quality sodium to keep you training harder for longer.
- 5mg Black Pepper Extract (as BioPerine®)** When it comes to ensuring mineral and amino transport, BioPerine is the best insurance policy you can include in any formulation. Mammoth BCAA didn't spare any expense when it comes to making sure all the amino acids and critical electrolytes get absorbed rapidly.
- 0 No Artificial Colours or Dyes!**

DIRECTIONS FOR BCAA:
Recommended Dose – Adult: Take 1-4 servings per day (13 g/serving). Mix product well in 1-2 cups (8-16 fl oz / 236-472 ml) of liquid (water, juices etc.) during or immediately after exercise. Can also be used throughout the day for basic hydration and better recovery.

NO ARTIFICIAL COLOURS OR DYES

3 AWESOME FLAVOURS **+ 3 NEW FLAVOURS AVAILABLE SOON**

MAMMOTH PUMP HIGH INTENSITY PRE-WORKOUT

THE ULTIMATE SOLUTION FOR EXTREME TRAINING AND MAXIMUM PERFORMANCE

DEMAND more out of yourself and your pre workout. Whether it's in the gym or on the field Mammoth Pump delivers that sustained performance enhancement you've been looking for.

DOMINATE your training with mind blowing intensity and a laser like focus that will exceed your expectations, pushing you to new heights. Have the power you need, when you need it and never get caught running on empty. With skin splitting PUMPS and crazy VASCULARITY, MAMMOTH SUPPLEMENTS gives you the tools, you provide the sweat.

NOW RAISE THE BAR.

Directions For Mammoth Pump: As a dietary supplement, we recommend assessing tolerance by mixing a half scoop (4.5g) in 3-5 oz of cold water. If well tolerated, you may increase to a full serving of one scoop (9g) mixed in 6-10 oz of cold water. Do not exceed 2 scoops in a 24-hour period.

3000 mg

CITRULLINE MALATE

This must have ingredient is essential for maximizing blood flow and increasing pumps. It does so by increasing vasodilation via nitric oxide pathway. Normal arginine gets degraded by special enzymes called arginases when taken orally whereas citrulline does not. This efficiency actually allows citrulline to increase arginine levels higher than arginine itself.

1500 mg

BETA ALANINE

We decided to use an accurate dose of beta-alanine to help ensure great endurance. Beta-alanine does this by increasing the buffering capacity of working muscle, fights off acidosis, delays fatigue, and increases endurance capacity. If you're a real athlete, then you need a real deal dose of beta-alanine in your pre-workout without question.

1000 mg

TAURINE

This important anti-oxidant and water balance regulator has demonstrated in numerous studies to help increase endurance levels. Unfortunately, you can't load this and increase muscle levels despite the fact that when training a lot gets released into the blood stream. What you can do is take acute doses before or during training to help your training levels while training.

750 mg

CREATINE HCl

This powerful form of creatine gets absorbed rapidly and requires lower amounts to be effective compared to other forms of creatine.

500 mg

AGMATINE SULFATE

We included this for two reasons. First it helps with blood flow. It works by binding to the alpha2-adrenergic and imidazole receptors of endothelial cells increasing nitric oxide (NO) production which may assist in volumizing blood vessels.

Medicinal Ingredients Ingrédients médicinaux:

Serving size 1 scoop (9 g) / Par portion individuelle (1 mesure / 9 g).

ENDURANCE

STRENGTH

PERFORMANCE

500 mg

TYROSINE

This simple, yet effective amino acid is a precursor to numerous neurotransmitters known to regulate mood and appetite. Its primary role in Pump is as a nutritional dopamine precursor. It stacks well with stimulants known to cause a “crash” and really rounds out what researchers call the strength-duration curve. It’s a staple in many stimulant cocktails for this exact reason.

200 mg

CAFFEINE

Let’s be honest, we all love caffeine for a reason. It works to get your mental drive going and is the backbone of many stimulant complexes. Clinical research also suggests it supports athletic activity which supports its use in many sports nutrition products which is exactly why we formulated it into PUMP.

5 mg

PIPER NIGRUM EXTRACT (AS BIOPERINE®)

When coming up with such an advanced formula, we wanted to make sure many of the natural components have optimal absorption. Bioperine is the “must have” bioavailability enhancer in the supplement world and we use the clinically researched dose in every scoop of Pump It’s a highly potent extract of Piper nigrum which is standardized for a component called piperine.

Suggested Use:

Adult Dose Take 1 serving (9 g) 1-2 times per day. Add 1 serving (9 g) to 6-12 oz water, mix well and drink. Consume 45-90 minutes before exercising. Not to exceed 1 scoop per dose.

Recommended use or purpose:

Helps the body to metabolize carbohydrates, fats and proteins. Helps tissue formation. Helps to form red blood cells. Workout supplement. Athletic support. Source of amino acids involved in muscle protein synthesis. Helps to relieve fatigue, to promote endurance, and to enhance motor performance.

E-Z Dose

The 'E-Z Dose' System - We formulated Mammoth MEAL to be super easy to use. To achieve this goal we designed each scoop in Mammoth MEAL to contain exactly 100 calories (10 g protein, 10 g carbs and 2.25 g fat). Some people need more calories than others. Some people need to track their caloric intake. However you want to use Mammoth MEAL, we have you covered. Please review the chart below which outlines Mammoth MEAL serving sizes, macronutrient information, mix ratios and calories.

POWDER TO WATER RATIO			MACRONUTRIENT BREAKDOWN			SERVINGS PER CONTAINER
# of SCOOPS	WATER (fl.oz.)	TOTAL CALORIES	PROTEIN (g)	CARBS (g)	FAT (g)	
1 x	+ 4 fl.oz.	= 100	10 g	10 g	2.25 g	80
2 x	+ 8 fl.oz.	= 200	20 g	20 g	4.5 g	40
3 x	+ 12 fl.oz.	= 300	30 g	30 g	6.75 g	27
4 x	+ 16 fl.oz.	= 400	40 g	40 g	9 g	20

MORE ABSORPTION. MORE PERFORMANCE.

Research has proven that hard training athletes lose many critical vitamins and minerals during training as they put higher demands on their bodies.

MAMMOTH MULTI ensures that you replenish those critical micronutrients your body needs to achieve your goals.

 Specifically designed for hard training athletes to deliver exactly what you need to support performance, growth, and overall well-being.

 Contains a specific blend of micronutrients to deliver, and help you absorb, critical vitamins and minerals in the doses and forms you need.

 Adaptagen/antioxidant complex to help cope with the mental and physical stress of training and everyday life and fight off free radicals.

 Supports energy, men's health/virility and liver detoxification all in one formula

SERVINGS

BECAUSE STRENGTH MATTERS!

Creatine is the number one muscle building supplement in the world, with hundreds of studies showing its effectiveness to deliver Mammoth amounts of muscle and strength. That's why it is the foundation for so many people – it WORKS. Each serving of **MAMMOTH CREATINE** supplies a full 5 grams of 100% pure Micronized Creatine Monohydrate. Tasteless and odorless, **MAMMOTH CREATINE** mixes easily into water or juice and does not readily settle at the bottom which means no gritty taste or texture only GAINS.

Recommended use or purpose:

Increases muscle mass when used in conjunction with a resistance training regimen; Improves performance in repetitive bouts of brief, highly-intense physical activity.

Recommended Dose - Adult loading phase:

Take 1 teaspoon (5 g) 4 times per day for 5-7 days. Take separately from products containing caffeine.

Recommended Dose - Adult Maintenance phase:

Take 1 teaspoon (5 g) daily. Take separately from products containing caffeine.

Medicinal ingredients:

Each scoop (5 g) contains: Creatine Monohydrate 5g

Non Medicinal Ingredients: None
